

Cocktails Team

In Cocktails Team your colleagues will be given the opportunity to show everybody how good they are as barman. Teams will design and elaborate a very special cocktail that represents the company's identity. As you go, you will learn how to make many other famous drinks.

The event starts with a flair-bartender exhibition, making everybody get into the groove. Then teams will split into couples in order to attend simultaneously to the following activities:

Cocktail work-shop: our flair-bartender will demonstrate how to elaborate 3 cocktails, giving you a general overview on flavours and mixtures, after what you will be able to create your own drink.

Challenges: through competition between teams in Team Building exercises, precious gems will be earned by participants. These gems may be used to buy the ingredients and materials needed to produce your corporate cocktail.

All team members must attend both activities so that everybody will rub shoulders in the corporate cocktail's creation process along with contributing to finance all purchases. Once the challenge rounds are fulfilled, teams rush to finish their cocktail master piece.

Then every team will present their creation and explain the audience the underlying rationale for them to design such a cocktail... particular flavours, colours, spirits, aromas... and how they correspond to the company's identity.

The jury, formed by a member of each team and our flair-bartender, will taste each cocktail. A winner will be elected rewarding the cocktail's quality and the analogies between the ingredients and the company values.

As a final point... cocktails party time!
