

## Pirate Adventure

Pirate Adventure is a XVI century inspired team building often seen as being a mini incentive event although it's certainly achievable with a more competitive budget.

Our first hand knowledge of the beautiful Villa of Sitges (Barcelona) led us to design in early 2007 this intrepid event which ideal duration ranges from 3 to 4 hours. Alternative locations along the Spanish coast line are nevertheless an excellent option for you to be considered: Costa Brava, Balears, Valencia, Mar Menor, Andalucía...

The participants, divided into groups, are provided with the necessary equipment to experience a furious adventure: ancient pirate maps, GPS's, digital cameras...

On board the vessels, participants will enjoy the breeze, the sun and the sea while they collaborate in sailing tasks. The choice of the ship is yours: XIX century inspired schooners or brigs made of noble woods, modern sailing ships (i.e. Babaria 36, 37, 38 or 41) motorized launches, out-board dinghies...

If you're looking at team work whilst sailing, modern ships are definitely the most suitable option for your guests. However, if your goal is to reward your team and enjoy a fantastic gastronomy on board, we strongly recommend old sailing vessels.

The event monitors well characterized according to the time frame when the adventure is set will be strategically located throughout the charming streets of Sitges. On arrival to key locations, our friendly (and not so friendly!) characters will challenge teams with various team building exercises in the pursuit of the final victory.

An intrepid adventure, an ideal location in sunny Spain, a team of experienced professionals at your service, team work, Spanish wine and tapas "en route", cava on board...

A whole Pirate Adventure is waiting for you! Weigh the anchor!
